## SUMMARY

Senior IT Project Manager seeking growth in the R19 target occupation.

## EDUCATION

B.Sc. Computer Science, Example University, 2012

## EXPERIENCE

Senior IT Project Manager, Example Retail Group, 2019-present

IT Project Manager, Example Software House, 2014-2019

## KEY ACHIEVEMENTS AND SKILLS

- Cut purchase-order cycle time from 30 days to 9 by redesigning the requisition-to-payment process with finance and warehouse leads.
- Presented weekly status, risks and budget variance to the steering committee and escalated scope changes for approval.
- Ran requirement elicitation workshops with 40 business users and turned ambiguous requests into signed-off specifications.
- Ran the Agile delivery cycle for 4 concurrent client projects, owning the backlog, sprint cadence and release milestones.
- Integrated SAP Business One with the e-procurement platform through a nightly reconciliation job.
- Grew and mentored a delivery team from 6 to 18 people with no regretted attrition.
- M.Sc. Information Technology Management, Example Institute, 2016
- Delivered a THB 8M e-procurement platform for a retail group one month ahead of go-live at 22% under the agreed delivery budget.
- Defined the 3-year roadmap for the procurement platform and aligned it with group finance objectives.
- Acted as the single point of contact between client stakeholders and engineering across 5 regulated industries.
- Tracked incident queues and service dashboards daily to spot delivery risks early.
- Directed 5 system analysts, 10 developers and 3 QA engineers, running quarterly performance reviews and training needs analysis.
- Hosted fortnightly customer advisory sessions to collect feedback and reprioritise features.
- Negotiated change requests and payment milestones with three vendors, keeping the programme within contract value.
- Tools: Jira, Confluence, Microsoft Project, SQL, Excel
- Wrote SRS documents and kept a requirements traceability matrix for every release.
- Built a demand forecasting dashboard with SQL that reduced forecast error from 35% to 9% for 120 branches.
- Facilitated root cause analysis sessions after production incidents and tracked corrective actions to closure.
- Set up UAT sign-off checklists so every deliverable met the agreed acceptance criteria before release.
