EXPERIENCE

Machine Learning Engineer, Example Fintech, 2021 - present
Data Scientist, Example Bank, 2019 - 2021

KEY ACHIEVEMENTS

- Developed machine learning models for credit risk using Python.
- Deployed models to production on AWS.
- Built data pipelines to process large data sets.
- Evaluated model performance and monitored model drift.
- Applied deep learning and natural language processing.
- Communicated model results to business stakeholders.
- Researched new algorithms and kept up to date with AI developments.
- Wrote unit tests and reviewed code.

EDUCATION

M.Sc. Computer Science, Example University, 2019

CERTIFICATIONS

AWS Certified Machine Learning - Specialty, 2023
