EXPERIENCE

Machine Learning Engineer, Example Fintech, 2021 - present
Data Scientist, Example Bank, 2019 - 2021

KEY ACHIEVEMENTS

- Built a gradient-boosting credit model in Python that raised approval accuracy by 6 points on 2M applications.
- Shipped 9 models to production on AWS SageMaker with p95 latency under 80 ms.
- Rewrote feature pipelines in Spark, cutting nightly processing from 6 hours to 40 minutes.
- Set up drift monitoring that caught a data shift two weeks before it hurt approval rates.
- Fine-tuned a Thai-English transformer that auto-classified 70% of support tickets.
- Presented model impact monthly to the risk committee and wrote model documentation for audit.
- Prototyped a retrieval-augmented assistant that answered 80% of policy questions correctly in a pilot.
- Raised test coverage of the ML codebase from 35% to 82% and reviewed 300 pull requests.

EDUCATION

M.Sc. Computer Science, Example University, 2019

CERTIFICATIONS

AWS Certified Machine Learning - Specialty, 2023
