EXPERIENCE

Network Engineer, Example Telecom, 2018 - present
System Administrator, Example Hospital, 2015 - 2018

KEY ACHIEVEMENTS

- Redesigned a 60-site WAN with BGP and OSPF, cutting average latency from 48 ms to 19 ms.
- Rolled out FortiGate firewalls and site-to-site VPN for 60 branches with zero security incidents in two years.
- Cut mean time to repair for network incidents from 4 hours to 50 minutes with PRTG alerting and runbooks.
- Automated configuration backups for 800 devices with Python and Ansible, saving 30 hours a month.
- Wrote and tested the disaster recovery plan for the core data centre, restoring service in 35 minutes during the annual drill.
- Led the core switch upgrade with two vendors over three weekends without unplanned downtime.
- Produced up-to-date diagrams and 40 procedures in Confluence used by the 24x7 operations desk.
- Ran a capacity study that justified a THB 6M bandwidth upgrade approved by the CTO.

EDUCATION

B.Eng. Computer Engineering, Example University, 2015

CERTIFICATIONS

Cisco Certified Network Associate (CCNA), 2019
