

Narin Example

Data Analyst | Aspiring Machine Learning Engineer

narin.example@mail.test | +66 81 555 0101 | github.com/narin-example

SUMMARY

Data analyst with 4 years of experience turning business data into models and dashboards. Looking to move into a machine learning engineering role.

EXPERIENCE

Data Analyst, Example Retail Co., Ltd.

2022 - present

- Built a customer churn prediction model in Python with scikit-learn and pandas; improved retention campaign targeting by 18%.
- Designed and deployed a FastAPI service on AWS EC2 that serves the churn model to the CRM team.
- Wrote SQL queries and ETL jobs to clean, aggregate and validate sales data from four source systems.
- Analyzed A/B test results with statistical hypothesis testing and presented findings to the marketing director.
- Documented data pipelines and model assumptions so other analysts could reproduce the work.

Junior Business Analyst, Example Logistics

2020 - 2022

- Created Power BI dashboards that tracked delivery KPIs for 12 regional managers.
- Gathered requirements from operations users and translated them into report specifications.

EDUCATION

B.Sc. Statistics, Example University, 2020

SKILLS

Python, pandas, scikit-learn, SQL, Power BI, FastAPI, Git, AWS EC2, basic TensorFlow

CERTIFICATIONS

- AWS Certified Cloud Practitioner (2023)
- Google Data Analytics Professional Certificate (2021)
